Journal of Fluid Mechanics **Volume 359 25 March 1998**

F. Domenichini & G. Pedrizzetti Impulsively started flow separation in wavy-walled tubes *page* 1

C. F. Delale & D. G. Crighton Prandtl–Meyer flows with homogeneous condensation. Part 1. Subcritical flows 23

J. M. Lopez Characteristics of endwall and sidewall boundary layers in a rotating cylinder with a differentially rotating endwall 49

P. Le Quéré & M. Behnia From onset of unsteadiness to chaos in a differentially heated square cavity 81

M. A. Hallworth, A. J. Hogg & H. E. Huppert Effects of external flow on compositional and particle gravity currents 109

R. J. Riley & G. P. Neitzel Instability of thermocapillary–buoyancy convection in shallow layers. Part 1. Characterization of steady and oscillatory instabilities 143

S. Benz, P. Hintz, R. J. Riley & G. P. Neitzel Instability of thermocapillary–buoyancy convection in shallow layers. Part 2. Suppression of hydrothermal waves 165

S. J. Majumdar & N. Peake Noise generation by the interaction between ingested turbulence and a rotating fan 181

A. Avagliano & N. Phan-Thien Torsional flow: effect of second normal stress difference on elastic instability in a finite domain 217

P. Lin & P. L.-F. Liu A numerical study of breaking waves in the surf zone 239

G. L. Body & U. T. Ehrenmark Reflection of gravity waves by a steep beach with a porous bed 265

R. Malvano & F. Vatta Lubricated plane slider bearing: solution of the inlet problem with upstream free surface 281

S. B. Pope The vanishing effect of molecular diffusivity on turbulent dispersion: implications for turbulent mixing and the scalar flux 299

Y. D. Shikhmurzaev On cusped interfaces 313

H. H. Fernholz & D. Warnack The effects of a favourable pressure gradient and of the Reynolds number on an incompressible axisymmetric turbulent boundary layer. Part 1. The turbulent boundary layer 329

D. Warnack & H. H. Fernholz The effects of a favourable pressure gradient and of the Reynolds number on an incompressible axisymmetric turbulent boundary layer. Part 2. The boundary layer with relaminarization 357
